I had tried but not working

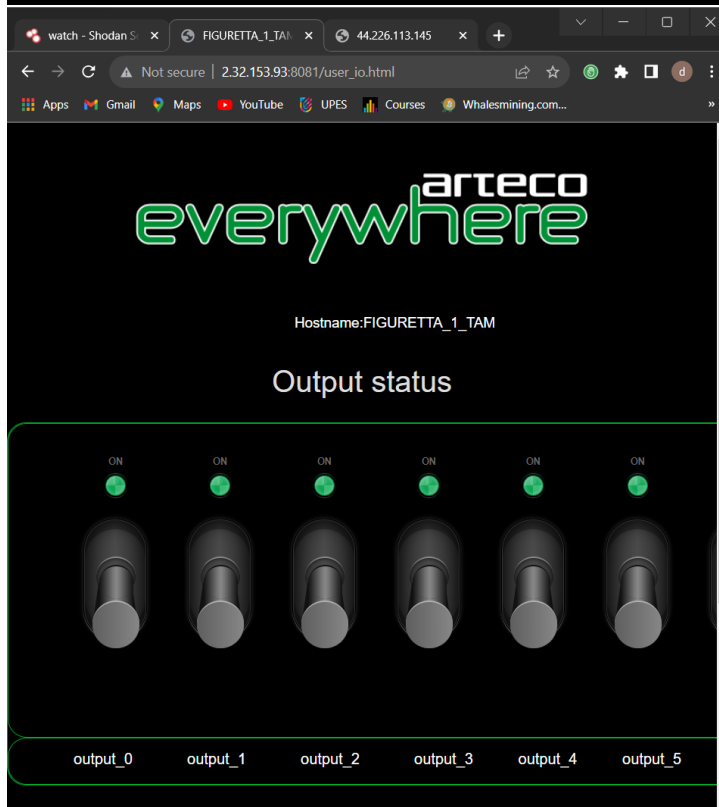

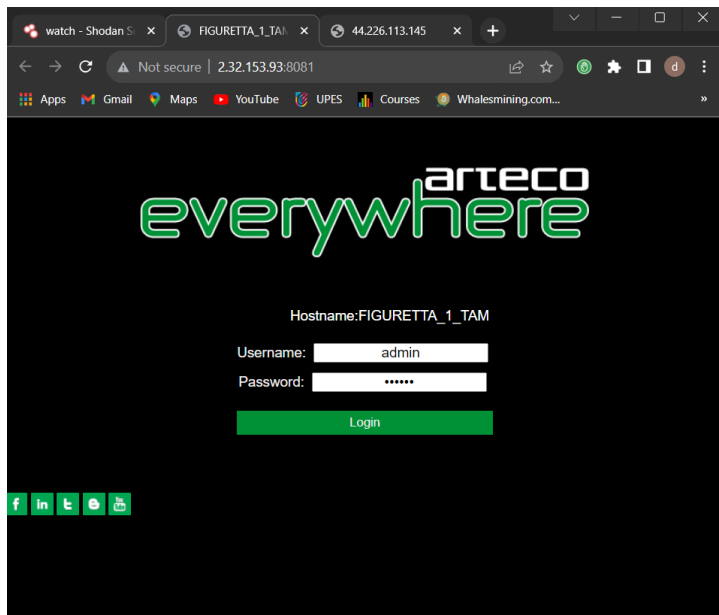

The screenshot shows a Shodan search results page for the query 'webcam+7'. The page is divided into several sections: a top navigation bar with various icons and a search bar, a main content area with a list of search results, and a sidebar with 'TOP ORGANIZATIONS', 'TOP PRODUCTS', and 'TOP OPERATING SYSTEMS'. The search results list includes IP addresses, hostnames, and server information. For example, one result is '185.67.2.195' with a 'webcam 7' server. Another result is '172.104.23.166' with a 'webcam 7' server. The sidebar lists organizations like 'Linode' and 'Locaweb Serviços de Internet S/A', products like 'webcam 7 httpd' and 'Apache httpd', and operating systems like 'Windows' and 'Ubuntu'.

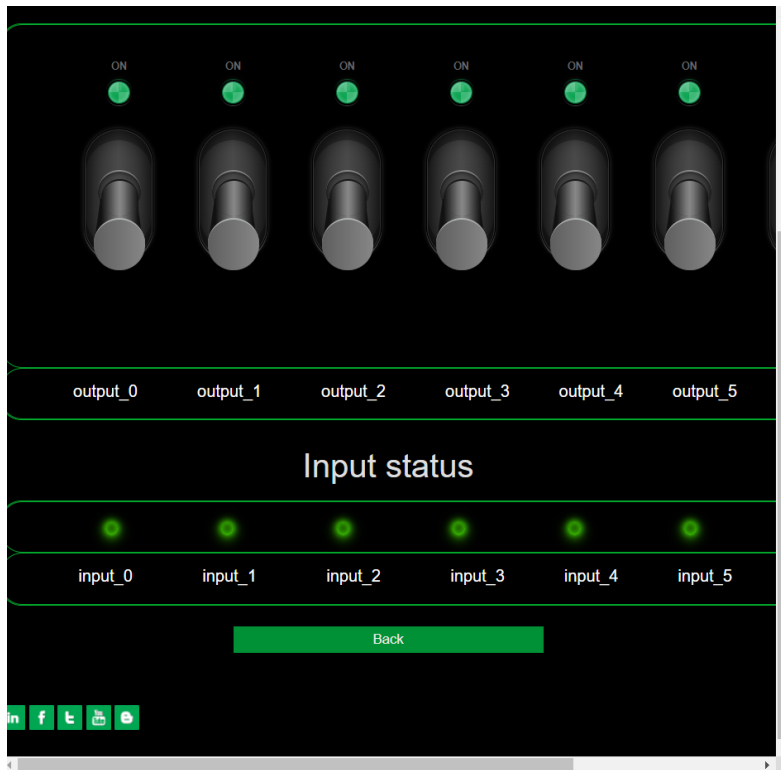

The screenshot shows the login page of the Webcam 7 application. The page has a blue header with the 'WEBCAM 7' logo and the text 'WEBCAM AND IP CAMERAS SERVER FOR WINDOWS'. Below the header is a navigation bar with links to 'Home', 'Multi view', 'Smartphone', 'Gallery', and 'Administration'. The main content area contains a login form with the text 'Please provide a valid username/password to access this server.' and fields for 'Username:' and 'Password:'. There is a 'Login' button below the password field. At the bottom of the page, there is a footer that says 'POWERED BY WEBCAM 7 V1.5.3.0' and 'xhtml css'.

Then searched for music on shodan
